

Booklet

Driver's Guide

DRAGON ELD

ELD Overview

Logging Device

The system uses an engine-connected hardware piece to record driving hours and miles automatically.

Driver App

Drivers can download the logbook app to their tablet or smartphone to view and manage their RODS or display them for a safety official.

Manager Portal

The online portal allows fleet managers to monitor compliance and access vehicle and driver info in real time.

Using the App on Different Devices

Single Driver

If you would like to use different mobile devices to keep your logs, make sure that you do not switch from one device to another before the data has been synced up with the server.

Team Drivers

Each driver needs to have his or her own account in order to use the app.
