DRIVER GUIDE

ELD SETUP

1. Find the diagnostic port on your vehicle. The required connector or adapter may be different for your vehicle. If you're having trouble locating this port, refer to your vehicle's owner manual.
2. Connect the ELD to the diagnostics port with the provided cable. Press until the clip snaps into place. Then, mount the device on the dashboard.

HOS MANAGEMENT

The screenshot shows a mobile application interface for editing duty status. At the top, the title 'Edit Duty Status' is displayed. Below the title is a grid showing a 24-hour cycle (M 1 2 3 4 5 6 7 8 9 10 11 N 1 2 3 4 5 6 7 8 9 10 11 M) with four rows representing different duty statuses: OFF, GB, D, and ON. The grid shows a sequence of status changes over time. To the right of the grid, four time points are listed: 04:08, 01:12, 05:27, and 00:02. Below the grid is a list of duty status options: Off Duty, Sleeper, Driving, On Duty, Personal Use, and Yard Moves. Each option has a corresponding icon (a circle with a dot or a solid circle). Below the list is a section for 'Start Time (ET)' and 'Duration'. The 'Start Time (ET)' is set to 07:50:07 AM. Below this is a section for 'Vehicle' and 'Location'. The 'Vehicle' is set to 'Truck 77' and the 'Location' is set to '3mi E from Linden, NJ'.

Follow these instructions to edit your logs:

- If you need to edit a past duty status, select the log and tap Pencil.
- Tap the plus icon to add a past duty status.
- Tap Start Time to specify the beginning of the status change. Then, tap Done. Repeat this step for the end time of your status addition.
- Add your status details:
 - Add Location
 - Add notes
- Tap SAVE in at the bottom.

*Driving time is automatically recorded and cannot be edited.
